

Acknowledgments

The authors would like to express their deep gratitude to Dr. David Brautigan, Professor and Director of the Markey Center for Cell Signaling, University of Virginia Health Sciences Center, Charlottesville, Virginia, for his support of this project from its inception.

This Program was initially developed with a grant from the State Council of Higher Education for Virginia and the Dwight D. Eisenhower Professional Development Program to Dr. Brautigan.

We would also like to thank our Fairfax County Public Schools teaching colleagues who participated in the first two Summer Research for High School Science Teacher institutes and the colleagues from around the state who have participated in workshops at teacher conferences and outreach activities.

We thank our students for their frank opinions of the process, the Virginia State Department of Education for recognizing the potential of this program to help Virginia teachers DO science with all of their students, Virginia Tech's Fralin Biotechnology Center for supporting dissemination through equipment loans and teacher workshops, and the teachers who participated in the first state-sponsored workshop.
